Dear Ms. Cantsee:

Enclosed please find materials related to two projects proposed for implementation on the Manti-La Sal National Forest. We are submitting these materials to you for your review and comment. The materials enclosed include copies of the inventory reports prepared for the two projects:

Pacific Corp Mill Fork Federal Coal Lease Tract UTU-71307 Extension, Emery County, Utah.

No prehistoric archaeological or historic properties were discovered during the inventory conducted for the proposed extension of 213 acres.

A Cultural Resources Inventory of the 2006 and 2007 Mine Drilling Programs (Muddy Tract Coal Lease), Manti-La Sal National Forest, Sanpete and Sevier Counties, Utah.

One new prehistoric archaeological site (42SV2774) was discovered during the inventory for this project. The site consists of a small, low density scatter of lithic artifacts of indeterminate age or cultural affiliation (no temporally diagnostic artifacts were present). As the report indicates, the site is not likely to yield additional information important in prehistory or history.

Based on the information presented in the two reports, the Forest Service has determined that the Secretary of Interior's Standards for Identification have been met. The Agency has further determined that site 42SV2774 is not eligible for listing in the National Register of Historic Places.

These materials are submitted to you as additional information for your review and comment. The Forest Service is also interested in any comments or concerns you may have regarding any culturally significant plant, other natural resources, or Traditional Cultural Properties you may have knowledge of in the proposed project area.

We would appreciate your expertise and advice in finalizing these determinations. If you have comments or concerns, or would like additional information on any of the sites described in the enclosed reports please feel free to contact Mr. Bruce Ellis, Forest Heritage Program Manager, (435) 636-3571.

Sincerely,

Dear Ms. Carlton,

**Subjects: UTU-71307 Pacific Corp Mill Fork Federal Coal Lease Tract
U-06-EP-0317f A Cultural Resource Inventory of The 2006 and 2007 SUFCO
Mine Drilling Programs**

The Paiute Indian Tribe of Utah is in receipt of your letter dated May 2, 2006 and have reviewed the material and have no objections pertaining to the Project. Our interest is not limited to cultural resources but include plants and animals as well as natural springs or other places of cultural significance. At this time we are not aware of any archaeological resources in or near the proposed site. We appreciate your solicitation of the Paiute Indian Tribe of Utah's input and your effort to address our concerns.

Please notify the Paiute Indian Tribe of Utah of any cultural information that is found including type and location, also any updates or changes to the project.

Thank You,

Dorena Martineau
